About me

My name is Juliette Belisle Greetham, I have lived in The Yukon my entire life. Growing up in a bilingual family, I was raised speaking both English and French, it has given me strong interpersonal and written communication skills in both.

I am passionate about community engagement, advocacy, and continuous learning. My interests span business, the environment, democracy, and community development. I find meaning in achieving goals, connecting with others, and broadening my perspectives.

In my free time, I enjoy spending time outdoors with my dog, being creative, and attending conferences. I also have a deep love for art and run my own botanical art business, Juliette Botanicals.

As a professional and team member, I am friendly, hardworking, and eager to learn new skills. I thrive in roles that require leadership, innovation, and strong communication. I am also patient, adaptable, and committed to making a positive impact.

Above all, I love The Yukon and its landscapes, its people, and its unique character. Through my work, I hope to contribute to making it a place that remains as authentic and inspiring as the individuals who call it home.

Skills
